Warranty

Thank you for purchasing this Macrom product. Should your product need warranty service, please return it to the shop where you buy it or to the Macrom distributor in your country. The warranty does not cover damage due to improper use and or installation, incorrect connections to power supply and audio video sources, exposure to excessive humidity, unauthorized repair attempts or modifications.

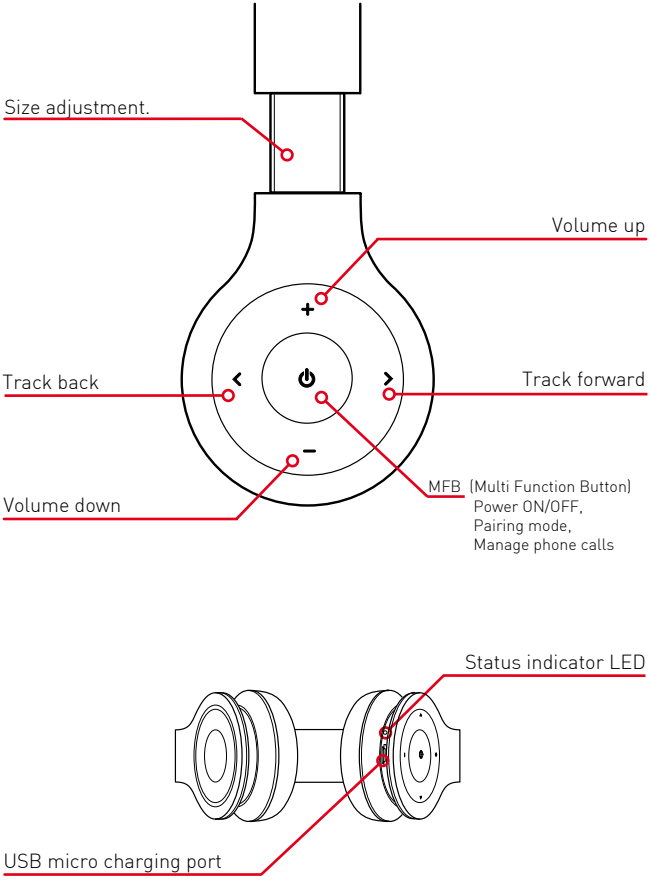
Safety information

To prevent hearing damage when listening the headphones gradually turn up the volume until you reach a pleasant and safe listening level. Pay attention to do not use the headphones when your full attention to your surroundings is required. For example is not safe (or even illegal in some countries) to use headphones while driving a vehicle or crossing a street.

Specifications

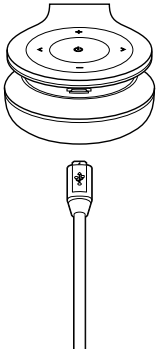
M-HPB20 can make and receive calls hands-free with compatible mobile phones and listen to music from a compatible music players. The operating range is within 10 meters. M-HPB20 is compliant with the following Bluetooth® specifications: Bluetooth V3.0 + EDR and supports HSP, HFP, A2DP and AVRCP profiles. Power supply input 5V DC - 0.5 A.

Product overview



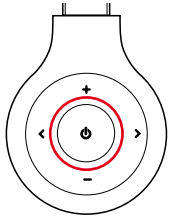
Charge the battery

Use the Micro USB cable provided with the product to charge the battery. Plug it in the connector located under the left ear cup of the headphone, then plug the other end into a compatible USB charger or a USB port of a computer. The status indicator LED is steady red while charging or steady blue if the battery is fully charged. For a faster charge please remember to power off the headphone before charging the battery. The fully charged battery allows up to 10 hours of continuous music playback or phone calls. The maximum standby time is approximately 100 hours. Is possible to listen to music and/or make phone calls while charging the battery. If the battery needs to be charged the headphone will prompt a warning tone "DU DU DU" and LED indicator is red and blinking.



Switch On/Off

- To switch ON, press and hold the MFB key about 3 seconds until the headphone prompts the "Power ON" voice message and the indicator LED blinks blue 3 times.
- To switch OFF, press and hold the MFB key about 3 seconds until the headphone prompts the "Power OFF" voice message and the indicator LED blinks blue 3 times.



Pairing and connecting with a Bluetooth device

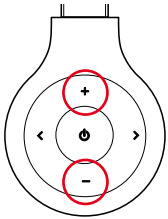
To enter pairing mode, make sure the headphone is powered off then press and hold the MFB key about 6 seconds until the headphone prompts the "Power ON" and "Pairing" voice messages and the indicator LED blinks red and blue alternately. From the Bluetooth function of the device to be paired search for new device named "M-HPB20". Select it and if requested enter "0000" passcode. When pairing is completed successfully the indicator LED blinks blue and the headphone prompts the "Pairing Completed" voice message. If the pairing procedure is not successful, please switch off the headphone and repeat the above steps. The specific pairing procedure may vary, so please refer to your device user manual for further information. Multilink technology allows simultaneous connection of two different devices. To connect the second device simply repeat the above procedure.

Re-connecting with a Bluetooth device

Every time the headphone is switched on, it will connect to the last connected device automatically. When the headphone is in standby mode and doesn't connect to any HFP devices, short press MFB button once, it will connect to last connected source device automatically.

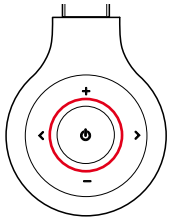
Adjust the Volume

To adjust the headphone volume during a call or while listening to music press the volume up or down keys. When the volume is turned to maximum or minimal levels, a "BIP" tone is prompted. Please remember that excessive sound pressure from headphones can damage your hearing.



Manage phone calls

To receive a phone call from the mobile phone use it as usual. To manage the phone from the headphone refer to the commands below:

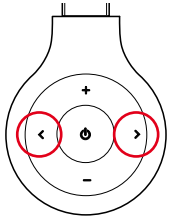


- Voice dial: Press and hold MFB key for 1 second.
- Redial last number: Short press MFB key twice quickly.
- Pick up a call: Short press MFB key when the phone rings.
- Reject a call: Press and hold MFB key.

With some mobile phones, if an incoming call is accepted using the phone commands the conversation will be automatically transferred to the phone. To transfer it back to the headphone use the audio source switch of the phone. Refer to the phone user manual for further information.

Listen to music

Connect the headphone to a compatible music player that supports A2DP profile. Please note that the music functions available depends on your music player. If a call is received or originated while listening to music, the music will be paused until the call ends. To manage music from the headphone refer to the commands below:



- Pause/Play: Short press MFB key.
- Track forward: Short press → key.
- Track back: Short press ← key.

Product care

Please remember that your Macrom product is an electronic device, and so needs to be treated with care.

- Do not subject it to mechanical shock or vibrations.
- Do not subject it to eccessive heat.
- Keep it away from water and excessively humid areas.
- Keep it away from high electromagnetic fields.

There are no user-serviceable parts inside. Opening the product or try to repair it will terminate the warranty.
